

**ETHIOPIAN RURAL HOUSEHOLD SURVEY/94  
QUESTIONNAIRE FOR THE SECOND ROUND**

---

**NOTES FOR VERIFIERS/SUPERVISORS**

Some questions need to be carefully verified before data entry start. We came across additional items that need coding, ratios that cannot be accepted by the entry form, more than one code in one response and a few inconsistencies. In addition to this, open ended questions that appear in different sections of the questionnaires will be categorized and coded.

General

- For all 1 digit variables  
0 = Not Willing (Except for those questions where 0 is valid code).  
9 = Don't know (Except for those questions where 9 is valid code).
- For all questions referring to Year, use the last 2 digits, i.e., 1984=84, 1976=76,  
Erase the first 2 digits.
- All open ended questions should be categorized and coded.
- Fractions, percentages and ratios are not accepted by the entry program. Convert all fractions, percentages and ratios into proportions,  $\frac{1}{2} = 0.5$ ,  $\frac{1}{4} = 0.25$ ,  $100\% = 1$ ,  $10\% = 0.1$ ,  $\frac{2}{3} = 0.66$ , etc...

Cluster Information

- 1) - Write the codes for Region, Woreda and PA in the boxes provided (See Region, Woreda and PA Codes list attached).
- Use a 3-digit Household number for this survey (Q.2).

- Note: (i) Female business activities are separated into two tables in the questionnaire. If you get grains used to make tella (such as "Bekel") transpose to the above table. Other activities such as selling onion, sugar cane, salt,... will be in the last row. The last row of the second table will be used for General trade activities.
- (ii) If Id code in Q.3 (Id code of HH member responsible) represent a male member of the HH, then check this against the roster card and transpose it to Page 11, Off-Farm and Business Activities section.
